CONCRETE REINFORCER® LCR-105

BASE: Synthetic Resin Dispersion

VISCOSITY: 1600-2600 cps @ 75°F

SOLIDS CONTENT: 49.0-53.0%

PH VALUE: 4.0-5.5

WEIGHT PER GALLON: 8.80-9.20 lbs

FREEZE THAW STABILITY: None

CLEAN UP: Water (wet), Soap & Hot Water (dry)

SHELF LIFE: 6 Months in Unopened Containers

GENERAL INFORMATION

Concrete Reinforcer® LCR-105 is a solids, PVA-based, surfactant stabilized liquid designed for use as a concrete or cement reinforcer. The Concrete Reinforcer® is used as an additive and will improve the properties of the finished product by its flexural strength, water resistance and adhesion to other surfaces.

The Concrete Reinforcer® can be both mixed in with concrete or it can be applied to the surface via spray gun, roller or brushed on. To create the strongest finished product possible, it is recommended Concrete Reinforcer® be placed directly into the concrete or cement mixture before applying it to any surface.

WARNING

All containers holding this additive must remain sealed when not in use to maintain viscosity, shelf life and to maximize the effectiveness of the Leech Concrete Reinforcer®.
